Community Sustainability Rebate Program Pre-approval Round 1 2023 - 2024

* indicates a required field

Overview

The community during the development of Towards Albury 2050 set several community carbon emission targets. These include a reduction in carbon emissions by 50% compared to 2017 by 2030 and net zero emissions by 2040.

The purpose of the CSRP is to provide sustainability rebates for AlburyCity residents and commercial organisations. The rebate is designed to encourage the Albury community to transition to a zero emission and climate resilient city with, rebate are available under four themes:

- Renewable Resources – (eg. solar systems, solar batteries).
- Electrification – (eg. induction cooking facilities, hot water system).
- Reduction of Carbon Emissions - (eg. Electric Vehicle Charger).
- Energy Efficiency – (eg. LED lighting, insulation, pool pumps).

General Conditions

- The applicant must agree to and have read and understood the Program Guidelines.
- The applicant must agree to give permission for AlburyCity staff to visit the applicant property to undertake on-site verification.
- The application must be submitted via Council's preferred platform and include all required attachments.
- The applicant should note that each individual product or service has a specific allowable percentage of the total cost.
- The sustainability rebate amount received per financial year cannot exceed the maximum allowed per property.
- Applicants may request preapproval to ensure Council has sufficient funds to administer their rebate.
- The program's funding is subject to Council's annual budget processes and funding is limited.
- New applications for sustainability rebates will not be accepted once funding of the sustainability rebate has been expended. Information will be available on AlburyCity's website.
- The sustainable product must remain on the property and become a fixture if there is a change of tenant or property ownership.
- It is the applicant's responsibility to be aware of the Development or Approval process. Minor and low-impact works may not require development or construction approval, provided they fully comply with the exempt development standards as set out by the State Environmental Planning Policy (Exempt and Complying Development Codes) 2008.The applicant will acknowledge and agree that works will be completed per exempt development standards or provide evidence of correct approvals.

Applicants: please note

Before completing this application form, you should have read the guideline: Community Sustainability Rebate Program | AlburyCity (nsw.gov.au) guideline.

This section of the application form is designed to help you, and us, understand if you are eligible for this grant.

If you have any questions in regard to these eligibility criteria, please email **info@alburycity.nsw.gov.au** with the reference of Community Sustainability Rebate Program.

This is not applicable for property owners.

Previous Rebate Information

Have you received the Community Sustainability Rebate Program funding before?
*
○ Yes (If yes, answer the next question).
○ No
Applicants are able to apply for this program per property, per financial year, unless the first application is for the Energy Assessment - Scorecard.

If yes, please indicate date, eligible product and amount of rebate received:

Example: March 2023, Solar system, $500.

Rebate Items

Which Sustainability Rebate/s are you applying for? *
☐ Electric Vehicle Charger
☐ Energy Assessment
☐ Heat Pump Hot Water System
☐ Solar Rooftop Hot Water Systems
☐ Induction Cooktop
☐ Insulation
☐ Lighting
☐ NABERS Rating
☐ Pool Pump
☐ Solar Battery
☐ Solar System
You can apply more than one rebate.

Pre-approval amount sought:

Maximum rebate available is $2000.

Community Sustainability Rebate Program Round 1 Pre-approval Form 2023-2024

Please complete this section if you are applying for Heat pump Hot Water System, otherwise move to the next section.

Heat pumps are a very efficient alternative method for hot water production as they extract heat from the ambient air. These systems can output up to five times the heat energy compared to the electricity consumed by the system.

Note: To complete this section, you may require to refer to the product specification sheet.

Brand and Model:

Nominating a product enables an assessment to be conducted before you proceed. This ensures the product to be installed is eligible. It is recommended a quote is attached to your application.

Refrigerant type and/or Global Warming Potential:

Coefficient of Performance:

COP must be ≥ 5.

Please complete this section if you are applying for Solar Rooftop Hot Water, otherwise move to Declaration section.

Note: To complete this section, you may require referring to the product specification section.

Brand and Model:

Nominating a product enables an assessment before you proceed to ensure the product to be installed is eligible. It is recommended a quote is attached to your application.

Is the solar panel frost tolerant?
○ Yes
○ No
(If no, you are not eligible for the rebate).

Is the property subject to a State or local heritage item or is in a heritage conservation area?
○ Yes
○ No

Will the solar system visible from the road side?
○ Yes
○ No

Please provide evidence of correct approvals:
